Perfect from
product to service**

FILTRATION

The DG 30/70 machines are provided with a filter surface up to 30,000 cm² and air load on filter (m³ / m² / h) according to BIA standards to maximize the efficiency, vacuum performance and lifetime of the machine.

Absolute filters (99.995% DOP efficiency) are provided for filtering toxic dust.

POWER

The DG 30/70 machines are provided with side channel blower from the world's best manufacturers, to improve the quality and performance. They are powerful, silent and suitable for continuous and heavy works. They don't require maintenance and they don't wear since there is no transmission system.

FLEXIBILITY

The DG 30/70 machines are designed to draw in dust, liquids and solids at the same time. The releasable wheeled container aids in easy emptying of the collected material. The external filter shaker keeps the vacuum performance and the filtration efficiency maximum during operation.
